

LEGALEASE — PROBLEM STATEMENT

Primary Problem:

Millions of freelancers, small business owners, and individuals in India cannot afford legal consultation for routine documents. Hiring a lawyer for a simple NDA or freelance contract costs Rs. 5,000–Rs. 25,000, which is prohibitive for micro-entrepreneurs.

Secondary Problems:

- Legal document templates online are rigid and cannot be customized.
- Users fear signing incorrect legal documents without professional review.
- Current solutions are either too expensive (lawyers) or too generic (free templates).

Target Users:

- Freelancers and independent contractors
- Small business owners
- Startups drafting initial employment agreements
- Landlords and tenants
- Individuals needing personal legal documents

Success Criteria:

- User can generate a complete legal document in under 60 seconds
- Document is legally structured with proper clauses
- Export available in PDF, DOCX, and TXT formats
- Zero cost to the end user
