

LEGALEASE — COMPLETE PROJECT DOCUMENTATION

1. PROJECT OVERVIEW

LegalEase is an AI-powered legal document generator that creates customized NDAs, contracts, and agreements using Google Gemini. Users input basic details and receive a professionally structured legal document in seconds.

2. PROBLEM STATEMENT

Legal consultation is expensive (Rs. 5,000–25,000 per document). Free templates are rigid and often legally insufficient. LegalEase provides free, customized, AI-generated documents.

3. TECHNICAL ARCHITECTURE

[Streamlit UI] → [FastAPI] → [GeminiDocumentGenerator] → [Gemini API]
Documents exported as TXT, DOCX, PDF via python-docx and fpdf2.

4. KEY FEATURES

- 4-step input form (type, parties, terms, date)
- AI generation in ~20 seconds
- Live editable preview
- 3 download formats
- Zero cost, no authentication

5. TECH STACK

Python 3.10+, FastAPI, Streamlit, Google Gemini (gemini-3.8-flash), python-docx, fpdf2, python-dotenv.

6. RESULTS

All 9 test cases passed. Generation time averages 20 seconds.

Application runs locally with no external infrastructure cost.

7. FUTURE SCOPE

- Multi-language support (Hindi, Tamil, etc.)
- Digital signature integration
- Document templates library
- Cloud deployment (Render/Railway)
- User accounts with saved documents

8. CONCLUSION

LegalEase successfully demonstrates how Generative AI can democratize access to legal document creation. By combining FastAPI's robust backend with Streamlit's intuitive interface and Gemini's language capabilities, the project delivers a practical, free, and fast solution to a real-world problem.
