

LEGALEASE — TEAM INVOLVEMENT IN DEMONSTRATION

TEAM MEMBERS:

1. Sindhi Sowjanya A
2. Harini T
3. Thilagavathy P
4. Deepthika P
5. Hemalatha E

TEAM ROLES & RESPONSIBILITIES:

Sindhi Sowjanya A: Full Stack Developer & Team Lead

- Led the overall project planning and architecture.
- Built the FastAPI backend (main.py, routes.py).
- Integrated the AI core with the backend.
- Wrote all 8 phase documentation.
- Recorded the final demo video and submitted the GitHub repository.

Harini T: AI Integration Specialist

- Selected the Google Gemini model (gemini-3.8-flash).
- Designed and refined the prompt engineering strategy.
- Tested AI output quality across multiple document types (NDA, contracts, lease).
- Tuned the system prompt to ensure legal structure and formatting.

Thilagavathy P: Frontend & UI/UX Designer

- Designed the Streamlit interface layout, color scheme, and typography.
- Implemented the form inputs, preview box, and download buttons.
- Ensured responsive and user-friendly design.

- Conducted usability testing with sample users.

Deepthika P: QA & Testing Engineer

- Ran all 9 performance test cases and documented results.
- Tested error handling (API rate limits, empty inputs, network failures).
- Verified all three download formats (TXT, DOCX, PDF) for correctness.
- Wrote the Performance Testing report.

Hemalatha E: Documentation & Research Analyst

- Researched legal document structures and compliance requirements.
- Prepared all phase PDFs (Brainstorming, Requirement Analysis, Design, etc.).
- Reviewed and edited all documentation for clarity and completeness.
- Managed the Google Form submission and GitHub repository documentation.

COLLABORATION PROCESS:

- Daily sync on WhatsApp (progress, blockers, next steps).
- Code pushed to shared GitHub repository daily.
- Weekly review meeting with mentor via Google Meet.
- Tasks divided based on individual strengths and roles.
- Final demo recorded after all features were tested and approved by the team.

DEMONSTRATION PLAN (WHO PRESENTS WHAT):

- Sindhi Sowjanya A

: Introduction, project overview, and problem statement.

- Harini T

: Explanation of AI integration and prompt engineering.

- Thilagavathy P

: Live demo of the Streamlit UI – form input, generation, editing, and download.

- Deepthika P: Walkthrough of testing results and performance metrics.
- Hemalatha E: Documentation overview, scalability, and future scope.
- All members: Joint Q&A session at the end.

EFFORT DISTRIBUTION (Approximate):

- Full Stack Development: 25%
- AI Integration & Prompt Engineering: 20%
- Frontend & UI/UX: 20%
- QA & Testing: 15%
- Documentation & Research: 20%

CONCLUSION:

Each of the 5 members contributed a critical part of the project, ensuring a well-rounded, tested, and professionally documented solution. The demonstration reflects the combined effort of the entire team.
